THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

For exact location of the machine station, see Enclosure A, circled number one; and for detailed description, see Enclosure B, with legend.

1. The CSSZ (Ceskoslovenske statni stavebni zavody) kraj machine station in Prizrenice maintains accurate records of all building and construction machinery within the Brno kraj. This station makes repairs on all these machines, concentrating mainly on major overhauls of machines, automobiles and trucks belonging to the CSSZ, Brno kraj administration. Minor repairs to building machines are made by the kraj machine stations with the aid of mobile repair shops.
2. Machines are allocated and assigned to their respective places of work by the appropriate ministry in Prague. In cases of dire need, building machines can be allocated by the kraj inspectorate of the CSSZ in Brno, Ceska ulice number six.
3. This station was activated in 1951, and is very well equipped. The repair shops have new lathes, milling machines, shapers, grinders, etc. The enterprise has a railroad branch line. The kraj administration has an inventory consisting of various makes of excavators, Soviet and US bulldozers, mobile and stationary cranes, cement mixers and compressors. In January 1952, it received six new excavators of the MENCK type made by CKD-Prague. These machines had a capacity of one cubic meter. At the same time two Soviet made Inskavator - E - 1003 excavators, capacity 1.5 cubic meters, were delivered. During the testing of these machines, it was discovered that they had a capacity of .98 cubic meters and not 1.5 cubic meters, as noted on the machine itself. This condition created some "amazement" among persons in charge of the enterprise.

~~SECURITY INFORMATION~~

25X1

4. The kraj machine station employs about 200 workers (all of whom are specialists in their fields), and about 40 clerks.
5. About 30 percent of all employees were organized as members of the Communist Party [sic]; but only about half of this number were true to the regime, and these held responsible positions in the Prizrenice kraj station.
6. The average monthly wage of a skilled worker was around 4,000 crowns. The station operated on a two shift system: from 0600 to 1400, and from 1400 to 2200 hours.
7. Twelve men, uniformed in black and armed with pistols comprised the enterprise guard. The workers in the enterprise militia were armed with rifles. 25X1
The rifles of the militia are stored at the
Prizrenice station.
8. The machine station received all of its parts (forgings) from the newly constructed Skoda Works which started operations in 1951. The Skoda Works is located on Enclosure A, circled number 2. Warehouses are directly in the enterprise.
9. In spite of Communist propaganda, the morale of the workers was low because of their poor earnings.
